During the week Chicago and New York have During the week Chitago and New York have shown rapid and wide flactuations closin, prices of Wednesday as compared with noon prices of last Thiristay being 22-te lower. Early this calon dar week, prices were at the highes point. In both those markets there has developed a decided buill leeling, but the temptation to unload at a profit was too great to be resisted and prices consequently close towns. Francisco is lower, compared with a week upo and more has been done in monthly options. As a result of recent discussions there it is believed that mouthly options will receive more attention. The English uscossions there it is believed that mouthly options will receive more attention. The English pergoes marked rules weak and a trific lower for for cast curgoes arri als of which have been in mercus from this coast and sales slow. In far off positions there is ur request whatever. Mail advices are to May 24. Then the market was un the Atlantic seaboard and Ly heavy flour stocks Of the quantity their affect the Pacific coast had to 350 000 bushels and India 1 con 000 bushels. I roin of the quantity their anoth the Facinic coast had to 50 000 bushlets and india 1 (00 000 bushlets 1 from the latter country shiph ents are increasing although muci poet to be continent Regarding, langilish crops correspondent of the Minneapolis Miller says. It is to be expected from the abnormally cold weather we have experienced so far this year that the result will not be very satisfactory although up the reduced necesses a large crop was out of the guestior. France and Germany however speak well of their view that not the fairly lavorable on look in America mare than counter balances, probably the probability that Russia as in this vear will have a shirt crop. As far as I can at present see the world's wheat crop in 1886 will be a fair one by no mean so large as an itself but befrer than last year, and although stocks in the principal dountries and especially in the United kin dom and France will be running very short betaken now and arrest time it is not at all der I tow that Moy is a arily over that the decided divande looked for in some juarters will take place. At the same time as I have before jobiled of there should be more probability of some all the intercement that of a leafting.
